

## AUTH MULTIDRONE DATASET LICENSE AGREEMENT

AUTH has created the “AUTH MULTIDRONE” dataset in the context of the “MULTIDRONE” collaborative project funded from the European Union Horizon 2020 research and innovation programme, under grant agreement number 731667. The AUTH MULTIDRONE dataset contains videos of various types of content, acquired within the framework of the project. In order to advance research in autonomous UAV cinematography and related fields and assist dissemination and exchange of information that promote sciences, AUTH made the AUTH MULTIDRONE dataset available to researchers. All requests for the dataset must be submitted in writing by the researcher’s institution, prior to the release of the dataset. To receive a copy of the dataset, the researcher (hereinafter referred to as “Signatory”) must agree to the conditions below, and sign the document. The dataset can be downloaded after the receipt of the signed document.

Whereas the Signatory desires to use the AUTH MULTIDRONE dataset at its sole risk and at no expense to AUTH, he/she agree on the following:

1. The dataset will not be further distributed, published, copied or further disseminated by the Signatory in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a different facility or organizational unit in the requesting university, organization or company in its original or any modified version. The Signatory may not grant anyone access to the dataset by giving out his/hers username and password to unauthorized parties.
2. The Signatory may only use the dataset after this License Agreement has been signed and returned to AUTH.
3. The names of the subjects in the dataset are not released. The Signatory agrees not to disclose the names of the persons in the dataset and to connect the data with the names, if he/she gets this information through another source.
4. The dataset is released for research purposes only. The Signatory will not use the original data or modified copies for commercial purposes or provide the AUTH MULTIDRONE dataset to profit making companies or organizations.
5. The whole procedure to download AUTH MULTIDRONE dataset from the corresponding server is free of charge. For any other method of shipping and handling of this dataset, the Signatory is charged and the relevant procedure should be arranged via e-mail.
6. AUTH makes no claim that the AUTH MULTIDRONE dataset encompasses all data collected during or associated with this project. AUTH reserves the right to change the type, the format and the structure of the released dataset.
7. AUTH MULTIDRONE dataset was formatted with a reasonable standard of care, but makes no warranties express or implied, including no warranty of merchantability or fitness for particular purpose, regarding the accuracy or completeness of the data or that the data are errors free.
8. The Signatory agrees to provide specific information to AUTH regarding how AUTH MULTIDRONE dataset is used, the users and usage of any application containing this dataset, any difficulties encountered in using the AUTH MULTIDRONE dataset and changes or enhancements to the AUTH MULTIDRONE dataset that would make it more useful to Signatory. In the case of changes or enhancements, the Signatory agrees to send the new version to AUTH and to allow AUTH to make this new version available to researchers. In such a case, full credit for the changes/enhancements will be acknowledged to the Signatory in the AUTH MULTIDRONE web page.
9. All documents and publications that report research on the AUTH MULTIDRONE dataset must mention the source of the data as “AUTH MULTIDRONE dataset” and include the website link to this source at the relevant AUTH server. Publications include not only papers, but also presentations for conferences or educational purposes.
